

All students have access to Mental Health Services in IPS

IPS is fortunate to have partnerships with several Community Mental Health providers who have offices in all of our schools.

These agencies can provide individual counseling, family therapy, skills building, and group therapy to our students.

If you would like to have your student connected to one of our providers, please call your child's school and leave a message for the social worker who can help get the process started for you.

- If you are uncertain which Mental Health provider services your student's school, you may call the school directly and ask to leave a message for the school social worker and have them contact you with that information.
